Subject Index of Volume 146

Alloys

- anodic dissolution mechanisms of metals and alloys, 1
- development of a shape memory alloy Fe-Mn-Si, 197
- effect of magnetic fields on the formation of Fe_{16}N_2 precipitates in Fe-N alloys, 151
- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317
- high resolution electron microscopy of phase decomposition microstructures in aluminium-based alloys, 161
- solidification structure of monotectic alloys, 105

Aluminium

- determination of the γ solvus surface in Ni-Al-X ternary systems, 123
- evolution of data for the plastic behaviour of $\text{Ni}_3(\text{Al}, \text{X})$ single crystals, 245
- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317
- high resolution electron microscopy of phase decomposition microstructures in aluminium-based alloys, 161

Anodic dissolution

- anodic dissolution mechanisms of metals and alloys, 1

Austenite

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131
- high temperature creep resistance of austenitic heat-resisting steels, 261

Brittle materials

- theoretical study of the fracture of brittle materials: atomistic calculations, 273

Carbon

- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317

Ceramics

- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91

Chemical sensors

- recent development and future of chemical sensors for high temperature use, 63

Chromium

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131

Composites

- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317
- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91
- mean-field micromechanics model and its application to the analysis of thermomechanical behaviour of composite materials, 291

Copper

- detection of elastic distortions created by martensitic transformation and deformation using small b.c.c. particles in a copper matrix, 181

Corrosion

- electrochemistry of molten salt corrosion, 15

Creep

- high temperature creep resistance of austenitic heat-resisting steels, 261

Crystals

- evaluation of data for the plastic behaviour of $\text{Ni}_3(\text{Al}, \text{X})$ single crystals, 245
- simple criteria for epitaxial relationship between f.c.c. and b.c.c. crystals, 205

Deformation

- detection of elastic distortions created by martensitic transformation and deformation using small b.c.c. particles in a copper matrix, 181

Diffraction

- applications of X-ray dynamical diffraction techniques to materials research, 233

Diffusion

- relaxed stresses and relaxation kinetics caused by diffusion around a second-phase particle, 217
- thermal oxidation of silicon substrates through oxygen diffusion, 51

Elastic distortions

- detection of elastic distortions created by martensitic transformation and deformation using small b.c.c. particles in a copper matrix, 181

Elastic wave transfer

- non-destructive evaluation of materials and structure by the elastic-wave transfer function method, 327

Electrochemistry

- electrochemistry of electroless plating, 31
- electrochemistry of molten salt corrosion, 15

Electroless plating

- electrochemistry of electroless plating, 31

Electrolytes

- solid electrolyte sensors for gaseous oxides for pollution monitoring, 81

Fatigue

- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317

Fibre-reinforcement

- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91

Fibres

- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91

Fracture

- theoretical study of the fracture of brittle materials: atomistic calculations, 273

High resolution electron microscopy

- high resolution electron microscopy of phase decomposition microstructures in aluminium-based alloys, 161

Interfaces

- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91

Iron

- development of a shape memory alloy Fe-Mn-Si, 197
- effect of magnetic fields on the formation of Fe_{16}N_2 precipitates in Fe-N alloys, 151

Magnetic fields

- effect of magnetic fields on the formation of Fe_{16}N_2 precipitates in Fe-N alloys, 151

Manganese

- development of a shape memory alloy Fe-Mn-Si, 197

Martensite

- detection of elastic distortions created by martensitic transformation and deformation using small b.c.c. particles in a copper matrix, 181

Metals

- anodic dissolution mechanisms of metals and alloys, 1
- interfacial compatibility in ceramic-fibre-reinforced metal composites, 91

Micromechanics

- mean-field micromechanics model and its application to the analysis of thermomechanical behaviour of composite materials, 291

Nickel

- determination of the γ solvus surface in Ni-Al-X ternary systems, 123
- evaluation of data for the plastic behaviour of $\text{Ni}_3(\text{Al}, \text{X})$ single crystals, 245

Nitrogen

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131
- effect of magnetic fields on the formation of Fe_{16}N_2 precipitates in Fe-N alloys, 151

Oxygen

- solid electrolyte sensors for gaseous oxides for pollution monitoring, 81
- thermal oxidation of silicon substrates through oxygen diffusion, 51

Particles

- relaxed stresses and relaxation kinetics caused by diffusion around a second-phase particle, 217

Phase decomposition

- high resolution electron microscopy of phase decomposition microstructures in aluminium-based alloys, 161

Plastics

- evaluation of data for the plastic behaviour of $\text{Ni}_3(\text{Al}, \text{X})$ single crystals, 245

Pollution

- solid electrolyte sensors for gaseous oxides for pollution monitoring, 81

Precipitation

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131
- effect of magnetic fields on the formation of Fe_{16}N_2 precipitates in Fe-N alloys, 151

Salt

- electrochemistry of molten salt corrosion, 15

Sensors

- solid electrolyte sensors for gaseous oxides for pollution monitoring, 81

Shape memory alloy

- development of a shape memory alloy Fe-Mn-Si, 197

Silicon

- development of a shape memory alloy Fe-Mn-Si, 197
- fatigue in SiC-particulate-reinforced aluminium alloy composites, 317
- thermal oxidation of silicon substrates through oxygen diffusion, 51

Solidification

- solidification structure of monotectic alloys, 105

Solutes

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131

Steels

- cellular precipitation involving both substitutional and interstitial solutes: cellular precipitation of Cr_2N in Cr-Ni austenitic steels, 131
- high temperature creep resistance of austenitic heat-resisting steels, 261

Stresses

- relaxed stresses and relaxation kinetics caused by diffusion around a second-phase particle, 217

Ternary systems

- determination of the γ solvus surface in Ni-Al-X ternary systems, 123

Thermal oxidation

- thermal oxidation of silicon substrates through oxygen diffusion, 51

Thermomechanical behaviour

- mean-field micromechanics model and its application to the analysis of thermomechanical behaviour of composite materials, 291

X-ray dynamical diffraction

- applications of X-ray dynamical diffraction techniques to materials research, 233
